Company Talk

GeneArt – ThermoFisher Scientific

ThermoFisher
SCIENTIFIC

The world leader in serving science

Meet your potential future employer!

The RIGeL Excursions & Industry Relations group organizes virtual excursions, so called company talks. Leaders and members of different companies will give an insight into the structure and work-flow of the companies and provide PhD students and students with useful hints for applications.

The next company talk will be given by GeneArt GmbH (ThermoFisher).

GeneArt GmbH is a German company and is leading provider in the field of DNA engineering and downstream processing. GeneArt technology platforms range from the manufacture of RNA- and codon-optimized synthetic genes to complete gene-to-protein production and CRISPR genome editing. GeneArt was acquired by one of the world's largest medical technology companies, ThermoFisher, in 2010.

Dr. Sebastian Wennekamp (Quality Manager) will introduce GeneArt, ThermoFisher and will give insight into the field of quality management and assurance, and its application.

Thursday, 10.06.2021

16.00, via Zoom
