

# A Quality Perspective – Working in a Contract Laboratory for the Pharmaceutical Industry

**Dr. Holger Kühn**

Many young professionals dream about a career in the pharmaceutical industry. Many of them feel insecure about, what is of importance to be successful in this surrounding. Would chances be better, if one would have a PhD? Which are skills, recruiters look mostly for? Which are the ways, one could enter this sector? After finishing his studies in molecular biology, biochemistry and cell biology in Heidelberg, a PhD thesis and a Postdoc in Regensburg, Dr. Holger Kühn started working for the pharmaceutical industry. His path led him to a contract laboratory for quality control, giving him insight into plenty of different pharmaceutical companies with all their different products and requirements. In his talk, he wants to share his experiences from more than 13 years working in this sector.
