

Announcement of Seminar Course

»Special Seminar Series in Clinical Pharmacology«

Prof. Hala Gali-Muhtasib, Ph.D., American University of Beirut

Time: From 20th May to 8th July 2021, every Thursday, 17:00 – 18:30

Place: Online via Zoom, Meeting ID: 681 1936 9847

Join: <https://uni-regensburg.zoom.us/j/68119369847>

Delivering an oral presentation at a scientific conference or an internal seminar is an almost unavoidable task during your medical/research professional career. Although it may be intimidating, an oral presentation delivered effectively could be an exciting and valuable opportunity to share your work and expand your network. In this course, you will develop powerful skills in presentation and discussion of scientific research topics in pharmacology. You will learn how to read and thoroughly understand research articles published in reputable journals and effectively convey the significance of the research paper to your peers. You will be trained to organize and design clear and compelling presentation material, communicate your ideas confidently, command your audience's attention and respond effectively to their questions. You will also learn how to evaluate the presentation of your peers to build strong critical thinking skills and help them improve their performance.

About the lecturer:

Prof. Gali-Muhtasib (invited by PD Dr. Nahed El-Najjar and supported by the "**Program of the Bavarian State Ministry of Science and the Arts**") joins the Institute of Medical Microbiology as Guest Professor for summer 2021.

Position: Professor, Department of Biology, American University of Beirut (AUB), Lebanon

Nationality: US citizen, Lebanese

Education:

Ph.D. Biology, Kansas State University, Manhattan, Kansas, 1990.

M.Sc. Biology, American University of Beirut, Beirut-Lebanon, 1985.

B.Sc. Biology, American University of Beirut, Beirut-Lebanon, 1983.

Teaching Experience: Acquired 27 years of teaching experience. Taught a variety of courses: Biotechnology, Biosphere, Cancer and Natural Products, Human Biology, Freshman Biology, Undergraduate and Graduate Seminars, among others

Research interests: Medicinal plants; Cancer prevention and therapy; Cell cycle regulation; Mechanisms of cell death; Drug delivery; Stem cell technology

Publications: Published more than 100 articles in peer reviewed journals and edited 3 books
