

**Prof. em. Dr. Wilhelm Kriz**

Institut für Anatomie und Zellbiologie Universität Heidelberg

**New physiological and pathological aspects of glomerular filtration**

## Research focus of Professor Kriz

Prof. Wilhelm Kriz's research focuses on the pathology of glomerular diseases.

Recently he has focused on diabetic nephropathy and nephrosclerosis and tries to understand and investigates the effects of rheological stress on the glomerulus due to filtration pressure and shear forces by the filtration flow.

**Time:** Monday 8th July, 17:15h  
**Location:** Raum VKL 4.1.29  
Institut für Physiologie  
Universität Regensburg

The seminar is video transmitted to:  
Pathologie Universitätsklinikum Erlangen  
Krankenhausstr. 8-10  
Oberer Hörsaal, Raum A 2.150
